NON-SURGICAL PERIODONTAL THERAPY:

Disease Identification, Instrumentation, and Evidence-Based Updates

with

DR. SILKY SHARMA *RDH, Ed.D*

FRIDAY, JULY 26, 2024
Baltimore, Maryland

SATURDAY, JULY 27, 2024
Harrisburg, Pennsylvania

FRIDAY, AUGUST 9, 2024
Philadelphia, Pennsylvania

SATURDAY, AUGUST 10, 2024
Lancaster, Pennsylvania

ABOUT THE SPEAKER

Dr. Silky Sharma, RDH, Ed.D is an Associate Professor at Harper College, Palatine, Illinois, and has been a faculty member since 2010. She earned her master's degree from the University of Illinois with a focus on Evidence-Based Decision Making. Dr. Sharma earned her Doctorate from Grand Canyon University in Education, in Teaching and Learning with an emphasis on Adult Learning. She

has continued to practice dental hygiene, providing patient-centered care at a perio-focused office for 18 years.

Dr. Sharma is a clinic coordinator and provides courses on Periodontology for Dental hygienists, Advanced Perio Instrumentation, Perioscope-Clinic, Scientific Literature, Pain management, and Oral Pathology. She presents continuing education programs for dental colleagues on various topics. She is a consultant dental hygiene examiner for CDCA, the national dental/dental hygiene competency assessment organization. She has published articles in peer-reviewed journals and is passionate about teaching and learning from health care professionals.

COURSE OUTLINE

I. Signs and Symptoms of Periodontitis for NSPT

- A. Intro to EBDM
- B. Study Designs
- C. Assessment phase components
- D. Evidence-Based Risk Factors

II. Review of Advanced Instrumentation for NSPT

- A. Dental anatomy related to instrumentation
- B. Ultrasonic Tips
- C. Assessment Instruments
- D. Advanced Sickle Scalers
- E. Advanced Universals
- F. Advanced Area Specific
- G. Files and other specialty instruments

III. From Research to Practice: Evidence-Based Updates in NSPT

- A. Adjunct products used with NSPT
- B. Adjunct procedures used with NSPT
- C. ADA current guidelines in NSPT
- D. EFP current guidelines in NSPT

IV. Open Discussion

LEARNING OBJECTIVES

At the completion of this course the participants should be able to:

- Review the current guidelines on various aspects of NSPT.
- Summarize the different levels of evidence.
- Explain the role of biofilm in periodontal destruction.
- List the components of a comprehensive periodontal assessment.
- Identify the signs of periodontal disease.
- Describe the most effective ways to control oral biofilm.
- Review the components of a comprehensive periodontal assessment.
- Relate dental anatomy to periodontal instrumentation for NSPT.
- Discuss the designs of advanced instruments.
- Select various advanced instruments and ultrasonic tips to remove calculus efficiently.
- Select various hand instruments to remove burnished calculus.
- Identify the different levels of evidence.
- Explain the different components of Evidence-Based Decision Making (EBDM).
- Review the fundamentals of various adjunct procedures used during NSPT.
- Discuss the latest critically appraised research on each adjunct procedure.
- Critically analyze the efficacy and effectiveness of various adjunct procedures for NSPT.
- Synthesize the information and be able to create comprehensive treatment plans.
- Review the current guidelines related to adjunct procedures during NSPT.

Signs and Symptoms of Periodontitis for Non-Surgical Periodontal Therapy (NSPT)

Effective nonsurgical periodontal therapy is based on an accurate combination of periodontal disease assessment and treatment. This course is designed for dentists and dental hygienists and will incorporate critically appraised, evidence-based information including the assessment phase of care and instrument options.

Review of Advanced Instrumentation for Non-Surgical Periodontal Therapy (NSPT)

Positive outcomes from NSPT increase when deposit removal is effective. We will look at advanced instrumentation while considering instrument selection, avoiding burnishing deposit, and normal anatomical considerations. Emphasis will be placed on reviewing different types of advanced instruments for safe and effective calculus removal during patient care.

From Research to Practice: Evidence-Based Updates in Non-Surgical Periodontal Therapy (NSPT)

This evidence-based course will provide current information on various procedures and products currently being suggested as adjuncts to NSPT. The research provides a foundation for selecting the most effective treatment adjuncts resulting in the best possible patient care outcomes.

The speaker receives no support from any commercial organization and does not promote any commercial products or sell any tapes, books, instruments, forms or other materials for this course.

Dr. Sharma's presentation will utilize a lecture-based format. The course will blend didactic lectures, interactive clinical discussions, photographs, and instructive video demonstrations to illustrate the practical application of critical concepts. Throughout the seminar, participants will delve into the latest guidelines, backed by robust evidence, while exploring a range of procedures, therapeutic approaches, and commonly employed products that are frequently encountered with Non-Surgical Periodontal Therapy

What others are saying about this speaker:

- “I liked the review of clinical markers, progression of disease, and baseline information” - Webinar Attendee
- “Educated presenter who provided evidence for all the material presented.” - Webinar Attendee
- “Loved the passion that Dr. Sharma has for our profession!” - Webinar Attendee
- “Dr. Sharma is extremely knowledgeable and provided so much useful information.” - Webinar Attendee
- “The presenter is very well spoken & clearly has done her research.” - Webinar Attendee
- “Thank you! You have elevated my passion for the profession” - RDH (Las Vegas, NV)
- “Dr. Sharma is a fantastic educator! Useful information for dentists and hygienists alike.” - RDH (Saginaw, MI)
